Headed to College
The Effects of New York City's Small High Schools of Choice on Postsecondary Enrollment

# Supplementary Tables for the Policy Brief 

This report and the study upon which it is based are funded by the Bill \& Melinda Gates Foundation.

Dissemination of MDRC publications is supported by the following funders that help finance MDRC's public policy outreach and expanding efforts to communicate the results and implications of our work to policymakers, practitioners, and others: The Annie E. Casey Foundation, The Harry and Jeanette Weinberg Foundation, Inc., The Kresge Foundation, Laura and John Arnold Foundation, Sandler Foundation, and The Starr Foundation.

In addition, earnings from the MDRC Endowment help sustain our dissemination efforts. Contributors to the MDRC Endowment include Alcoa Foundation, The Ambrose Monell Foundation, Anheuser-Busch Foundation, Bristol-Myers Squibb Foundation, Charles Stewart Mott Foundation, Ford Foundation, The George Gund Foundation, The Grable Foundation, The Lizabeth and Frank Newman Charitable Foundation, The New York Times Company Foundation, Jan Nicholson, Paul H. O’Neill Charitable Foundation, John S. Reed, Sandler Foundation, and The Stupski Family Fund, as well as other individual contributors.

The findings and conclusions in this report do not necessarily represent the official positions or policies of the funders.

## List of Exhibits

## Table

1 SSC Effects on Four-Year High School Graduation Rates by Student
Cohort, on High School Diploma Type and on Indicators of College Readiness: Cohorts 1-4

SSC Effects on Four-Year Hugh School Graduation Rates by Student 2 Subgroups: Cohorts 1-4

SSC Effects on Enrollment in Postsecondary Education After Graduat-

SSC Effects on Enrollment in Postsecondary Education After Graduat5 ing from High School in Four Years, by Student Subgroups: Cohorts 1-4

## Small Schools of Choice

## Supplementary Table 1

## SSC Effects on Four-Year High School Graduation Rates by Student Cohort, on High School Diploma Type and on Indicators of College Readiness: Cohorts 1-4

|  |  | Control |  | P-Value for |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
|  | Target SSC | Group | Estimated | Estimated | Sample |
| Outcome (\%) | Enrollees | Counterparts | Effect | Effect | Size |

## Graduation rates by cohort

| Cohort $1(2004-2005)$ | 66.6 | 58.4 | $8.2^{*}$ | 0.015 | 4,473 |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Cohort 2 (2005-2006) | 71.1 | 59.9 | $11.2^{* *}$ | 0.000 | 3,933 |
| Cohort 3 (2006-2007) | 74.8 | 65.4 | $9.4^{* *}$ | 0.001 | 3,644 |
| Cohort $4(2007-2008)$ | 74.0 | 64.9 | $9.1^{* *}$ | 0.004 | 2,558 |
| Cohorts 1-4 | 71.6 | 62.2 | $9.4^{* *}$ | 0.000 | 14,608 |

## Type of diploma

| Graduated from high school | 71.6 | 62.2 | $9.4^{* *}$ | 0.000 | 14,608 |
| :--- | ---: | ---: | :--- | :--- | :--- |
| $\quad$ Local diploma | 13.2 | 11.4 | 1.8 | 0.160 | 14,608 |
| Regents diploma | 50.2 | 43.5 | $6.7^{* *}$ | 0.001 | 14,608 |
| Advanced Regents diploma | 8.2 | 7.3 | 0.9 | 0.514 | 14,608 |
| College readiness |  |  |  |  |  |
| Passed English Regents at <br> 75 or higher | 42.1 | 35.8 | $6.3^{* *}$ | 0.001 | 14,608 |
| Passed Math A Regents at <br> 75 or higher | 25.1 | 24.5 | 0.5 | 0.760 | 14,608 |

NOTES: Findings in this table are based on four-year follow-up data for 14,608 participants. Estimates of the effect of enrolling in an SSC were obtained by comparing mean outcomes for winners and losers of students' first SSC lottery while accounting for which lottery participants enrolled in an SSC and which did not, using the lottery outcome interacted with a binary lottery indicator as an instrumental variable for SSC enrollment and adjusting estimated standard errors for student clustering by the first school they attended. Some findings may not sum exactly due to rounding error.

A two-tailed t-test was used to assess the statistical significance of each SSC estimated effect with significance levels indicated as $* *=1$ percent and $*=5$ percent.

## English language learner

| Eligible for services | 65.0 | 60.4 | 4.6 | 0.366 | 1,020 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Not eligible for services | 72.0 | 62.3 | $9.7 * *$ | 0.000 | 13,588 |

NOTES: Findings in this table are based on data for 14,608 participants. Estimates of the effect of enrolling in an SSC were obtained by comparing mean outcomes for winners and losers of students' first SSC lottery while accounting for which lottery participants enrolled in an SSC and which did not, using the lottery outcome interacted with a binary lottery indicator as an instrumental variable for SSC enrollment and adjusting estimated standard errors for student clustering by the first school they attended. Some findings may not sum exactly due to rounding error.

A two-tailed t-test was used to assess the statistical significance of each SSC estimated effect with significance levels indicated as $* *=1$ percent and $*=5$ percent.

## Small Schools of Choice

## Supplementary Table 3

## SSC Effects on Enrollment in Postsecondary Education After Graduating from High School in Five and Six Years: Cohorts 1-3

|  |  | Control |  | P-Value for |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Graduation Year (\%) | Target SSC | Group | Estimated | Estimated | Sample |

## High school graduation

| In year 4 | 70.7 | 61.2 | $9.5^{* *}$ | 0.000 | 12,050 |
| :--- | ---: | ---: | :--- | :--- | :--- |
| In year 5 | 4.9 | 5.6 | -0.7 | 0.717 | 12,150 |
| In year 6 | 1.0 | 1.6 | -0.6 | 0.753 | 12,159 |
| By year 6 (cumulative) | 76.6 | 68.4 | $8.2 * *$ | 0.000 | 12,159 |

## Postsecondary enrollment in

 year after high school graduation| In year 4 | 47.5 | 39.7 | $7.9^{* *}$ | 0.000 | 12,050 |
| :--- | ---: | :---: | :--- | :--- | :--- |
| In year 5 | 1.7 | 1.4 | 0.3 | 0.609 | 12,150 |
| In year 6 | 0.2 | 0.0 | 0.2 | 0.317 | 12,159 |
| By year 6 (cumulative) | 49.5 | 41.2 | $8.3^{* *}$ | 0.000 | 12,159 |

NOTES: Findings in this table are based on data for 12,050 participants who graduated from high school in four years, 12,150 participants who graduated from high school within five years, and 12,159 participants who graduated from high school within six years. These sample sizes increase slightly over time as more data on students graduating from and dropping out of high school became available from the NYCDOE. Estimates of the effect of enrolling in an SSC were obtained by comparing mean outcomes for winners and losers of students' first SSC lottery while accounting for which lottery participants enrolled in an SSC and which did not, using the lottery outcome interacted with a binary lottery indicator as an instrumental variable for SSC enrollment and adjusting estimated standard errors for student clustering by the first school they attended. Some findings may not sum exactly due to rounding error.

A two-tailed t-test was used to assess the statistical significance of each SSC estimated effect with significance levels indicated as $* *=1$ percent and $*=5$ percent.
